Google Apps and eM Client

eM Client?

eM Client integrates email, calendars, tasks and instant messaging in a single modern desktop application. Switching to eM Client from other software is easy as you can import your data from Outlook, Outlook Express, Windows Live Mail, Thunderbird and others. Easily synchronize with Gmail or any other service provider and always have all your data available.

Why eM Client?

Full Google Apps support – Supports Gmail, Calendar, Contacts, Tasks and even Google Chat.

Fast, light and still full of powerful features – eM Client is a faster and lighter email client than its competitors but not lacking in advanced features.

VIP support –The eM Client support team pays attention to every problem of every single one of our customers, so they are never left without a solution and the feeling that no one cares.

eM Client - Solution to your customers' needs

Offline access – Your clients can carry on working even without an internet connection while having their data constantly available.

Data backup – eM Client has an automated built-in backup feature so no data will ever be lost again.

Signatures and certificates – Advanced management of signatures and certificates.

Remote management – You can deploy and manage the eM Client remotely. This includes central management of email signatures, templates, certificates and preferences, which makes eM Client suitable for organizations of all sizes.

Why bundle eM Client with your services?

Provide an added value that other Google Apps resellers cannot.

Acquire the extra customers who were hesitant to switch to Google Apps because of the lack of one or more features of a desktop email client.

Gain extra profit with no additional effort - simply sell eM Client to your customers together with Google Apps as a bundle.
