

## Case study: Architects 61

architects61

Company focus:	<b>architect studio</b>
Location:	<b>Singapore</b>
Licenses in use:	<b>150</b>
Preferred features:	<b>Calendar, Tasks</b>
Why eM Client:	→ <b>easily opens large attachments</b> → <b>stable</b> → <b>light on maintenance</b>
Use-case:	→ <b>internal and external communication</b> → <b>collaboration</b>

---

**A61 receives emails with large attachments and encountered problems with MS Outlook which crashed when opening such attached files. “I was exploring many email clients and searching for alternatives and found out that eM Client is able to do the work,” says **Steven Ching, IT manager from A61.****

“I was looking for a robust software that can handle our email requirements. I tested eM Client within the 30 days free trial and after that bought 5 more licenses for testing, just to make sure this software can really do the job. My end-users who tested it were happy and satisfied with the overall experience, mainly user-friendliness and stability of the software.”

## Case study: Architects 61

architects61

Architects 61 (A61) is one of the most established corporate architectural practices in Singapore with notable works of Marina One, Asia Square Tower and Tanjong Pagar Centre.

**A61 migrated to eM Client from Eudora in 2016, runs it together with Pico-mail server solution and currently uses 150 licenses.**

**“We are using eM Client company-wide for internal and external communication. The users find the interface easy and there is no extra training needed to switch to eM Client.**

Calendar and task feature in eM Client is extensively used, we also appreciate its reliable support of Outlook calendar invites.

Hardly spend any time fixing eM Client, the software is stable with Windows 7 and Windows 10 OS.”
