Up to 75% savings on TCO over a 5-year period
SIMPLICITY IS THE KEY TO BRILLIANCE

eM Client is a professional email desktop client for businesses. It supports a variety of functionalities (email, calendars, tasks, contacts, chat, etc.) and is compatible with every email server. Deployment has never been easier. Outstanding dedicated support.

EMAIL

eM Client is the best-equipped email client on the market, thanks to its ability to support virtually all existing email technologies (POP3, SMTP, IMAP, MDAemon, G Suite, Office365, Exchange, iCloud).

- Advanced full-text search across the entire application
- Message Encryption with PGP or S/MIME
- Automatic spell check
- Integrated email translation using Bing translator
- Templates, signatures, and Quick Text
- Advanced options for sorting and categorization
- Delayed send
- Mass mail
- Advanced email rules
OTHER FEATURES

- Central management of desktop clients for companies
- Deduplication tool
- Customizable widgets
- Sidebar for quick access to contact details, agendas, and invitations
- Full touch support
- Localized for 25+ languages
- Automated Backup tool

CONTACTS

Comprehensive Contact Management
Contacts can be managed in many ways in eM Client. This includes several views, numerous data fields, categorization, contact merging, automatic deduplication, and much more.

- Custom contact views
- An exhaustive number of data fields
- Categorization and folders support
- Easy contact merging
- Communication and attachment history
- Full-text search

CALENDARS AND TASKS

Organize your workflow, smart and easy
Calendar management in eM Client is easy to use, functional, and well-suited for a variety of business needs.

- Various calendar views
- Advanced search and filtering
- Share calendars and tasks with other people
- Meeting invitations and confirmations (IMIP/iTIP)
- Reminders
- Schedule meetings and indicate availability (i.e. free / busy.)
- Support for internet calendars (including FB calendar)

CHAT

Chat with your friends directly from eM Client
eM Client includes integrated chat, so you won’t need another application to chat with friends or colleagues.

- Chat interface works inside the application or as a detached window
- Google Chat, Jabber (XMPP)
- File transfer support
FULL SUPPORT OF MDAEMON

eM Client allows easy configuration and full synchronization with MDAemon in just a few clicks. With its easy-to-use interface, familiar design and no configuration required, eM Client provides users with:

- Seamless account set up (Auto discovery)
- Advanced scheduling
- Global Address List support
- Shared and Public folders
- SSO

MDAEMON SYNCHRONIZATION

UNIQUE BUSINESS FEATURES

eM Client can replace MS Outlook, giving companies the ability to fully utilize MDAemon’s functionality. Sync and share your emails, folders, contact list, as well as calendars to eM Client and enjoy the wide range of unique business features available, such as:

- Email access while offline
- Secure communication with encryption
- Automatic database backup
- Central admin tool for clients
- Translation of emails into 25 languages

CENTRALIZED CONFIGURATION FROM CLOUD

Our Server Settings technology allows you to deploy any settings from a cloud to all your installed clients:

- Establish a company-wide color theme
- Provide centralized signatures, templates, or Quick Texts (reusable text snippets)
- Set up accounts centrally from the cloud
- Restrict users to ensure only company emails or company chats are accessed on their computers or devices
- Force all employees to send encrypted emails only
- Customize client in any way company-wide

AUTOMATED DEPLOYMENT

With MSI package support, automatic setup with pre-defined scripts, and server settings, eM Client can easily be installed company-wide.

MIGRATION

Data import from other solutions is easy, straightforward, and mostly automated.

SUPPORT

We provide remote support, with a special focus on individualized communication. If required, we also offer an option for a customized SLA.

A FEW INTERESTING FACTS:
Through our customer survey, we collected feedback from 250 business customers. These are the most interesting results:

- Most of the migrations to eM Client are from MS Outlook
- Business customers are very satisfied with deployment assistance, integrations, data import, backup, and general support.
FREE CONSULTING AND ASSISTANCE DURING PURCHASING PROCESS

- TCO (Total Cost of Ownership) calculation
- Technical interoperability check
- Extended trial period

We prepare a simple but useful TCO calculation, to demonstrate the financial benefits of switching from another email client to eM Client. This calculation is based on the customer’s input.

We can provide a technical interoperability check of the existing server infrastructure and an assessment of supported features, to alleviate any uncertainty from the customer’s viewpoint.

Since we would like our customers to be fully satisfied with eM Client, we can provide an extended trial period. This is to test full functionality and capability of the software before the customer makes a purchasing decision.

FULL SUPPORT AFTER PURCHASE DECISION

- Deployment & Migration
- Optional SLA support
- Customer requirements in future roadmap

We can provide full assistance to the IT administration staff during the software deployment process. Additionally, we can execute a step-by-step migration process and account setup.

Our individualized communication approach for tech support is more than sufficient for the majority of our existing customers. But, based on customer requirements, we can offer and provide extended support in the form of a customized SLA (Service Level Agreement).

Lastly, we can incorporate the customer’s desired features into our future roadmap planning procedure.
